

A BRIEF INTRODUCTION TO

COUNTER FOR CONSORTIA

Three types of reporting

REQUIRED – Summary reports

- ✓ Aggregated: one report for all members
- ✓ No breakdown by institution
- ✓ Accessed via SUSHI or web interface

REQUIRED – Institutional reports

- ✓ Non-aggregated: separate reports for each member
- ✓ Broken down by default
- ✓ Access through Harvester Tools

OPTIONAL – Detailed reports

- ✓ Aggregated: one report for all members
- ✓ Broken down by institution
- ✓ Accessed via SUSHI or web interface
- ✓ Relies on optional extensions to the Code of Practice

Consortia report caveats

- ✓ Consortium usage reports are for purchased content only, so usage of content purchased separately by members may not appear
- ✓ Where usage can be attributed to multiple consortium members, the consortium reports may show lower usage than the sum of individual institutional reports
- ✓ Consortium members can opt-out of consortium reporting
